PROFFESIONAL SUMMARY

AI & Data Science Engineer with expertise in computer vision, machine learning, deep learning, and real-time video analytics. Skilled in Python, Object Detection, and OpenCV for building scalable ML pipelines and delivering high-accuracy object detection and tracking solutions. Experienced in developing biometric analytics systems and optimizing ETL workflows for real-time health insights. Passionate about applying AI, ML, and Gen-AI to solve complex, real-world challenges.

EDUCATION

- PG Diploma: Big Data Analytics, 08/2023
  Centre For Development of Advanced Computing (CDAC)- Bengaluru, India
  Final Grade: 73.88%
- B.E: Mechanical Engineering, 11/2018
  GH Raisoni College Of Engineering - Nagpur, India
  Final Grade: 8.23

SKILLS

- Programming & Data: Python, SQL, Pandas, NumPy
- Databases: MySQL, MongoDB
- AI & ML: Machine Learning, Deep Learning, TensorFlow, PyTorch, Computer Vision, NLP, Gen AI, Agentic AI
- Cloud & Big Data: Azure (Databricks, Data Factory), Hadoop, Spark
- Tools: Jira, Tableau, Excel (Pivot Tables, VLOOKUP)

WORK HISTORY

Associate Data Science Engineer II, 07/2025 - Present
Techdome - Indore, India

- Building AI-powered computer vision solutions using YOLO and Re-Identification (ReID) models to enable intelligent video analytics.
- Developing and optimizing real-time pipelines in Python for large-scale video processing and monitoring applications.
- Leveraging PyTorch, Torchreid, and OpenCV to design and deploy deep learning models for object detection, tracking, and identity recognition.
- Contributing to the scalable deployment of ML/CV systems, improving automation, efficiency, and decision-making in enterprise environments.

Data Scientist, 05/2024-06/2025
Squad Sync - Hyderabad, India

- Developed advanced biometric analysis algorithms using computer vision, signal processing, and machine learning, achieving 97% accuracy in face-based applications and 98% in heart rate detection.
- Engineered multi-sensor data processing pipelines, Integrating video and audio-based physiological signals to enhance biometric accuracy and system reliability.
- Optimized ETL pipelines, improving data processing efficiency for real-time health analytics.
- Contributed to a mobile health app, ensuring seamless biometric data integration while maintaining data privacy compliance.

Intern – Data Analytics, 03/2018-08/2018
Bajaj Steel Industries Ltd. - Nagpur, India

- Analyzed large datasets using Excel (Pivot Tables, VLOOKUP, Data Validation) to generate actionable insights.
- Created interactive dashboards and reports to support decision-making.
- Assisted in data-driven strategies by identifying trends and optimizing reporting processes.

PROJECTS

Unlocking Tokyo Olympics Insights: A Data Journey with Azure & Tableau
GitHub Link : http://tinyurl.com/mpr6jnk9

- End-to-End Data Analytics: Designed and executed a data analytics project on the Tokyo Olympics dataset, implementing ETL pipelines for seamless data storage and visualization.
- Results: Optimized ETL processes, reducing data processing time by 30% and enabling faster, more actionable insights.
- Technologies Used: Azure Data Factory, Azure Databricks, Azure Synapse Analytics, Tableau.

Anomaly Detection in Web Application Logs Using Machine Learning
GitHub Link : http://tinyurl.com/2yw5b55y

- Developed a machine learning-based system to analyze web application logs, detecting security breaches and system glitches through anomaly detection.
- Results: Achieved 97% accuracy, the highest among all approaches tested, significantly enhancing the reliability of anomaly detection.
- Technologies Used: Scikit-learn, PyCaret, Apache Spark, Data Preprocessing, Feature Engineering, Streamlit.

CERTIFICATIONS AND WORKSHOPS

- Microsoft Certified: Azure AI Fundamentals (AI-900), [2025]
- IIIT Hyderabad (CIE Labs Workshop on Computer Vision, 2025) – Represented Squad Sync, collaborated with experts to refine our computer vision-based biometric project and solve key technical challenges.
- Machine Learning Rock Star – the End-to-End Practice, Infosys Springboard, [2024]
